Bishop and Robinson: Map Exercises in History

Practical Map Exercises and Syllabus in Ancient History

Practical Map Exercises in Medieval and Modern European History

Each volume provides a complete outline of work and definite assignments for each lesson, thus relieving the teacher of the work required when separate printed outline maps are used.

A specially devised tracing plan enables the student to draw the whole of each map. Motor memory re-enforces visual memory. The hands are made to help the mind.

These volumes of Bishop and Robinson's Practical Map Exercises are on the North Carolina State List of approved high-school textbooks because they have proved to be the best means yet developed for map work.

A card or letter to Mr. Seagle will bring further interesting information.
